

New Moon Rituals through Affirmations & Scripting

It's the New Moon in Pisces but soon to be in Aries so I have been guided to create rituals around the moon's transition! I advise you to focus your intentions around emotional maturity, compassion, love & spiritual growth while the moon is still in Pisces. Once the moon enters action-oriented Aries, I would advise you to quickly switch gears and complete the following pages to be read out loud while under the moon's energy of Aries. This will catapult your wish fulfillment into reality. I have given you prompts so all you need to do is fill in the blanks. Be as open & as clear as possible when speaking to the Aries Moon. She will listen and answer just as you have requested. Hence, the reason for your wording having to be aligned with her universal language. I have taken the initiative to guide you into the right direction to speak to her. I hope this assists you with your journey towards wish fulfillment throughout this new astrological year. Please keep in mind, your scripting will call forth the energies of your future.
